ABOUT NATURETOUGH

At Intco, we've always prided ourselves on responding to the needs of our partners. A while back, several of our Intco partners challenged us to develop new brands for their outdoor and DIY product lines—something bold, durable, and built for real-world use. So, we got to work.

As we explored names, designs, and product possibilities, one name stood out from the rest: Nature Tough. It was simple, strong, and said everything we believed the product line should stand for—resilience, reliability, and readiness for any environment.

The more we looked at it, the more we realized we had something special. And instead of giving it away, we made the bold decision to keep Nature Tough as our own. We believed it deserved to be more than just another store label—it deserved to become a trusted name for weather-resistant, performance-built DIY products that anyone can rely on.

Nature Tough is built for those who take on the elements, who fix, build, and create no matter the season or setting. Whether it's rain, sun, wind, or snow—our products are built to hold up, hold strong, and help you get the job done.

Now, we're proud to share Nature Tough with you.
