PS Wall Panel

More than decoration, a green commitment.

With advanced recycling and manufacturing technologies, INTCO Decor transforms overlooked plastic waste into high-performance PS wall panels. Each panel contains up to 84% recycled content, bringing both aesthetic value and environmental responsibility. More importantly, at the end of its building lifecycle, the PS wall panel can be recycled once again, reborn as new material—achieving a true “cradle-to-cradle” cycle. Choosing PS wall panels means choosing sustainability, reducing the planet’s burden, and leaving a green promise for the next generation.

JC1955

NEW

This wall panel features a unique undulating wave-like design, where the subtle concave-convex changes create a strong visual impact and dynamic effect. The variations in wave height and spacing form a rhythmic pattern, giving the space a natural sense of movement and a soft dynamic feel. This design is perfect for modern, stylish interiors, adding a touch of contemporary art and personalized expression to the space.

Profile	Width	Height	Length	PCS/CTN
JC1955	245mm	19mm	2.9m	8

JC1955 -S141A

Top pick

This wall panel combines the classic black marble texture with a minimalist linear design, exuding a high-end, luxurious modern atmosphere. The smooth and naturally irregular marble veins create a unique artistic feel, offering depth and richness to the visual experience. The linear design gives the overall appearance a clean and sharp look, reinforcing the modern and simplistic aesthetic.

JC1819

NEW

This wall panel features a minimalist linear design with smooth undulations, creating a clean yet layered visual effect. The gradual transitions between the concave and convex shapes form a rhythmic pattern, establishing a balanced and comfortable atmosphere. The overall design strikes a balance between functionality and aesthetics, making it not only visually appealing but also highly practical.

Profile	Width	Height	Length	PCS/CTN

JC1819-W80A

Top pick

This wall panel features a natural wood grain effect with delicate vertical wood patterns. The warm brown wood grain is paired with dark brown lines, showcasing a perfect blend of nature and modernity. The wood grain design presents a natural texture that adds warmth and comfort to the space, while the brown lines enhance the overall design with depth and a modern feel.

JC1823

NEW

This wall panel features soft, curved shapes that create a smooth, undulating effect. The carefully designed curves bring a graceful sense of movement to the wall, preventing the space from feeling monotonous and adding visual layers. Each curved transition forms a natural rhythm, contributing to a warm atmosphere while maintaining a minimalist and modern aesthetic.

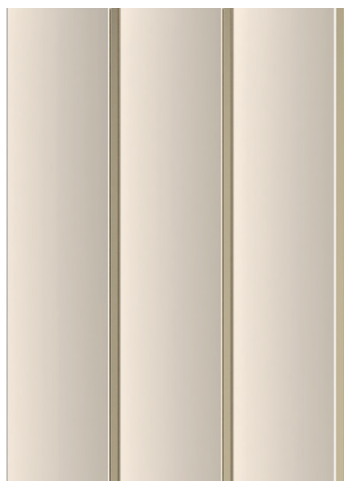

Profile	Width	Height	Length	PCS/CTN
JC1823	250mm	10mm	2.9m	10

JC1823-F28A

Top pick

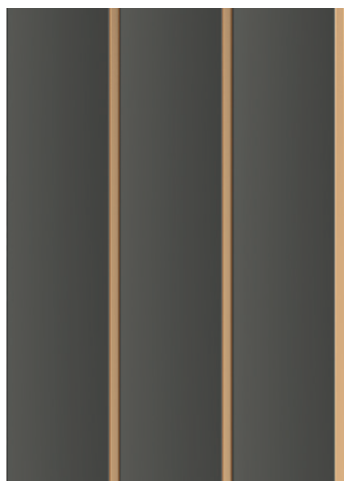

This wall panel features a warm beige surface, paired with a light gold border, creating an atmosphere of modern simplicity and elegance. The fine fabric-like texture on the beige surface adds a soft tactile and visual depth to the space. The light gold border introduces a touch of nobility and refinement, offering a warm yet modern contrast.

JC1645

NEW

This wall panel cleverly combines wave-like shapes with flat sections, creating a visual effect that is both dynamic and stable. The undulating waves add a sense of flow and depth to the wall, while the flat sections provide a steady foundation, balancing the overall rhythm of the design.

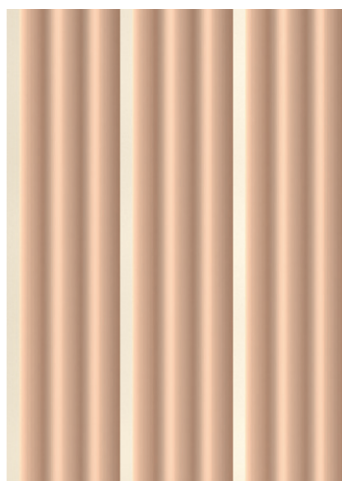

Profile	Width	Height	Length	PCS/CTN
JC1645	150mm	10mm	2.9m	20

JC1645-C07A

Top pick

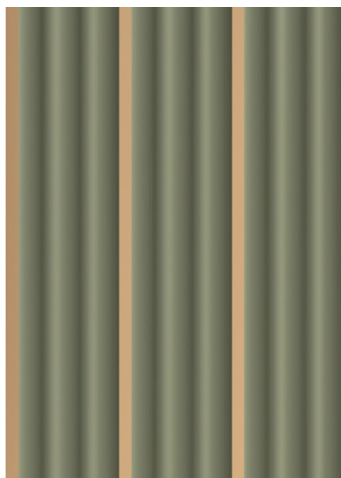

This wall panel features a soft green base color, complemented by light-colored fine lines, creating a design style that harmoniously blends modernity and nature. The green surface texture displays delicate ripples, bringing a natural and peaceful atmosphere to the space, as if merging with the outdoors. The undulating wave design breaks away from traditional flat surfaces, adding visual depth and making the overall design more dynamic and rich.

INSTALLATION

Tools Required for Installation

Wall Panel

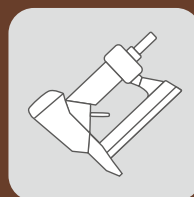

Coordinating Mouldings

Circular Saw

Tape Measure

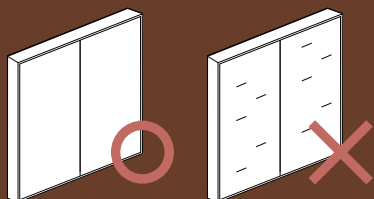

Steam Nailer

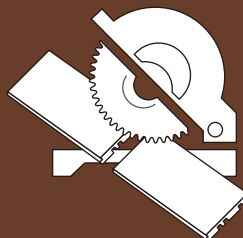

Nail Free Glue

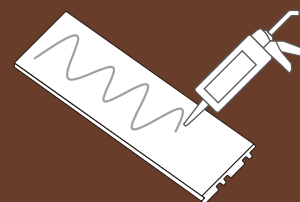

Installation

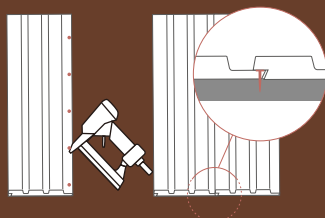

- 1** Prep-work with plaster board or plywood is recommended before the construction. Please remove wallpapers on the walls before the construction.

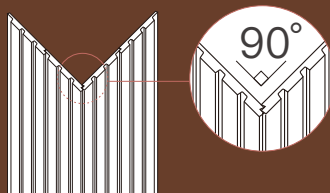

- 2** Circular saw can be used for cutting.

- 3** Apply nail free glue on the back of wall panel.

- 4** Wall panel can be installed in both horizontal and vertical direction. Apply air-tacker on the edge of the tongue to hide the pin-marks.

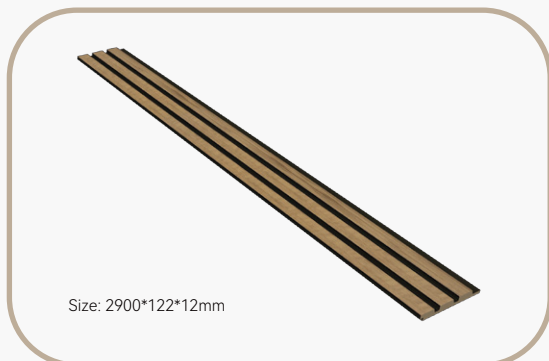

- 5** For corner, combine the two grooves.

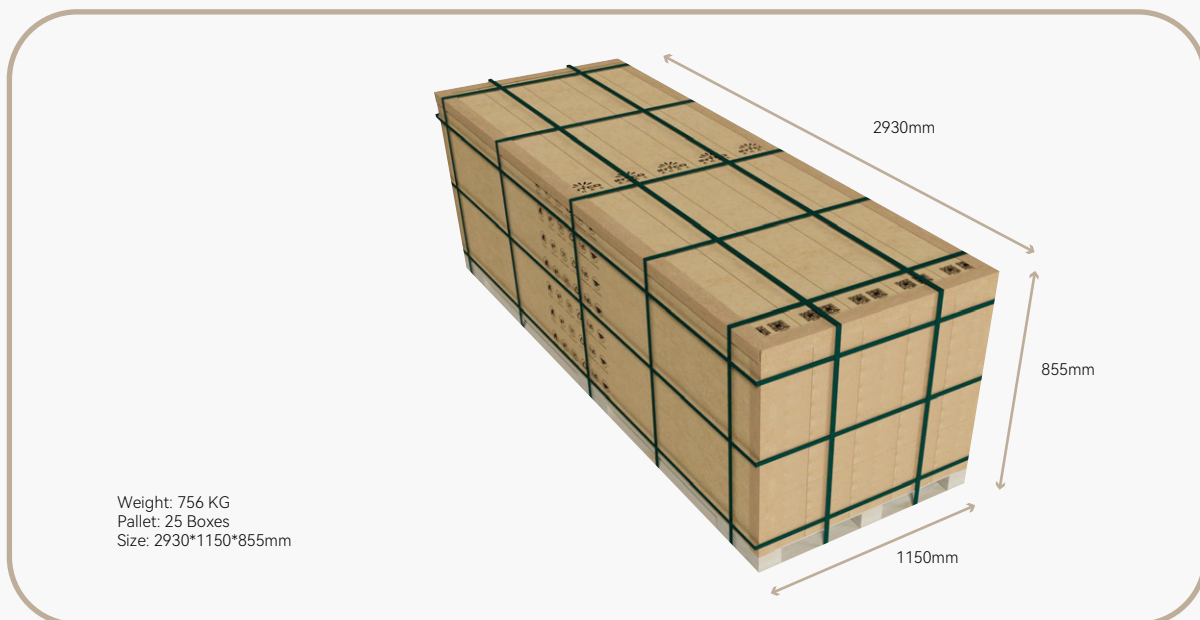

- 6** Coordinating mouldings can be used for clean and nice finish.
